ADVERANT NEXUS · THE AI BACKPLANE

Buy an AI product, or build your own? Build on Nexus and get both.

Ready-made AI never quite fits, and building your own takes years. Nexus has everything every company needs ready and secure, so your team only builds what makes you different, in weeks, on your own ground.

30
core features, ready to build with

1 login
instead of a new tool for every job

4 ways
to run it, including a box in your own rack

9
patent applications pending in Ireland

The buy-or-build question, answered

Buy a product
Fast to start, hard to live with

Fits your work	Rarely
Live in	Weeks
Your data	Sits with the vendor
Security	Theirs, one tool at a time
A change	Wait for their roadmap

Build from scratch
A perfect fit, a long wait

Fits your work	Yes
Live in	A year or more
Your data	Stays with you
Security	Rebuilt every time
A change	Your team, at full cost

Build on Nexus
Your own platform, at product speed

Fits your work	**Yes**
Live in	**Weeks**
Your data	**Stays on your ground**
Security	**Built in, not added later**
A change	**Make it yourself, safely**

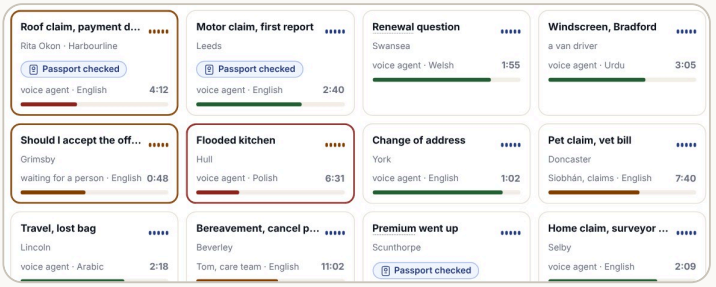

What your people use every day

Shown in HONESTAS, our insurance platform built on Nexus

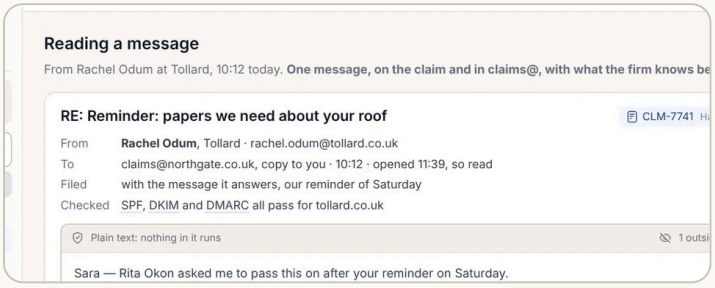

Chat · the team and the AI, with sources

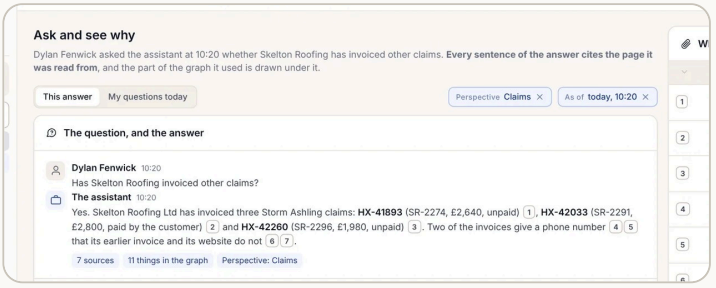

Contact centre · every live call on one screen

Team inboxes · each email filed with its case

Ask the company · every sentence cites its source

NO RIP AND REPLACE

Grows beside your systems

It reads what you already have. Nothing is switched off, and teams join when ready.

NO LOCK-IN

Any AI model, on a budget

Use any model, or your own. Every call is routed, counted and capped per team.

NO GUESSWORK

Every decision on record

Each one sealed with its evidence, so an auditor or regulator can check it offline.

Every feature

Adverant Limited · Registered in Ireland, company number 826944 · Venture Hub, 136 Capel Street, Dublin.

Everything you can build with

30 core features, each switched on per team, country or customer

Work together

Chat and rooms · AI in every thread

Team inboxes · routed, checked before sending

Contact centre · numbers, queues, transcripts

Notebooks · research with sources

Sharing and walls · other firms see only what you allow

Mobile apps · approvals in your pocket

Knowledge and data

Knowledge graph · ask, and see why

Files in, read safely · anything, opened in a sandbox

Memory · remembers, with consent

Version control · everything restorable

Maps and GeoAI · offline maps and imagery

AI and automation

AI switchboard · any model, routed and capped

Workflows · triggers, approvals, batches

Skills and AI buttons · tested and versioned

Ideas · many ideas, judged and shortlisted

AI workforce · agents with owners and limits

Your own models · trained on your hardware

Business operations

Revenue operations · pipeline, quotes, ledger

Payments · gateways, refunds, reconciliation

Decision rooms · decide together, sealed on record

Honest review · a second AI checks the work

Trust and control

Access and compliance · proof always ready

Shield · attacks stopped at the door

Sentinel · spots fraud and mistakes

Sandboxes · risky steps in a sealed box

Trust centre · evidence for auditors

Build and ship

The Forge · idea to production, tested every step

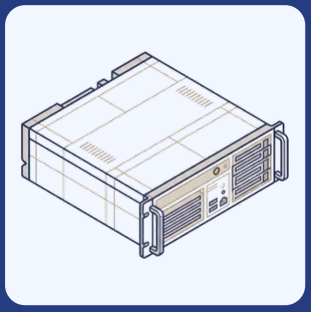

NexusQA · ten kinds of testing

API and MCP · into your own apps

Industry packs · insurance, banking and more

Run it where you want

The same platform in every place, your data where you choose

THE NEXUS APPLIANCE

The whole platform in a box for your own rack

- Your data never leaves the building
- One box, no cluster to build
- The same features as the cloud
- Sized for the AI models you use

Our EU cloud
Running today, hosted in Europe

Your data centre
Or your own cloud account

Fully offline
Cut off from the internet

What companies build first

Insurance

Claims files with sealed decisions, a broker inbox that files itself, fraud signals from Sentinel.

Banking and finance

Customer onboarding checks, a complaints contact centre, credit papers drafted from the file.

Legal and advisory

Matter rooms with ethical walls, research notebooks with sources, billing and payments.

Healthcare

Referral triage, consented clinical notes, and hosting kept in the country.

THE TEAM

Don Scott, Founder and CEO. Architect of Nexus and inventor on all nine patent applications. Co-founded Onepanel, a cloud-native OS for AI.

Donal Hanafin, Co-founder. Two decades building products for regulated financial services, most recently at Fenergo and CashAnalytics.

HOW TO START

Pick one team and one job. We connect your systems, switch on the features it needs, and you see it working on your own data.
