ADVERANT NEXUS · GOVERNMENT PACK

Inside the national cloud. Every decision explained.

The government pack helps case officers handle applications, permits and benefits. It reads registers and files inside your own jurisdiction, refuses any connection that would send data elsewhere, and drafts a plain-language reason for every decision a person makes.

A case with its facts. Each fact keeps its register and the time it was read. Sample data.

Faster casework. Decisions people understand.

Data stays in the country

Registers, files and models run inside the national cloud. A connector that would send data elsewhere is refused before it runs, and the refusal is logged.

Officers decide

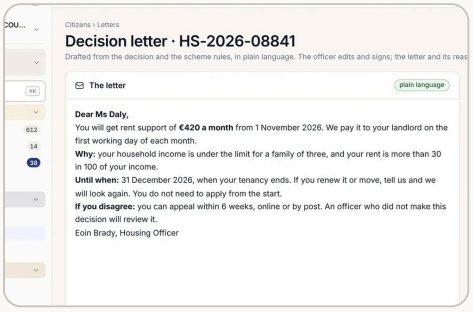

The AI prepares the facts and a view. A named officer decides, and a second check is added where your rules ask for one.

Reasons a citizen can read

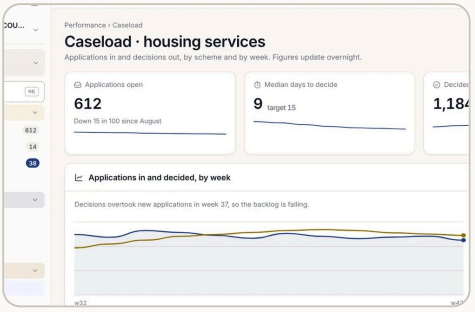

Each decision comes with a plain-language reason, the rules it rests on and how to appeal, drawn from the sealed record.

Screens for each desk

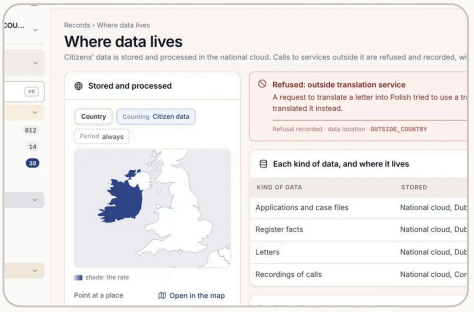

Sample screens with a made-up council

The letter. The reason, the dates and how to appeal, in plain language.

Caseload. Whether the team is keeping up, scheme by scheme.

Where data lives. A call that tried to leave the country, refused and done in the country instead.

Who uses it

One pack, with a view for each role

Case officer

The case, facts from the registers with their sources, the eligibility view and a drafted letter.

Team lead

Cases waiting, second checks to sign, and patterns across the team's decisions.

Oversight officer

AI decisions waiting for review, refusals of outside connections, and the AI register.

Appeals officer

The sealed record of the original decision and everything it rested on.

Citizen

Their own application, what was used, the decision and the reason, in their language.

How it works: from application to a reason the citizen reads.

01

Apply with eID

The citizen applies online with the national digital identity, and agrees which registers may be read for this case.

02

Gather from registers

Facts are read from national registers inside the country. Each keeps a link to where it came from.

03

Prepare a view

The pack tests the facts against the rules and drafts a view. Anything unusual is flagged for the officer.

04

Decide, explain, seal

An officer decides. The reason and how to appeal go to the citizen. The record is sealed.

WHAT IS SEALED

Each decision, sealed with its reasons.

When an officer decides, the decision, the facts, the rules and the letter are sealed together. An appeal starts from exactly what the first officer saw.

Anyone can check a sealed decision offline with a free verifier, without an account with us.

THE RULES YOU ANSWER TO

- **EU AI Act** · Regulation (EU) 2024/1689, Annex III 5(a)
  AI used to decide eligibility for public benefits and services is high-risk, with human oversight required.
- **Rights impact assessment** · EU AI Act, Article 27
  Public bodies must assess the effect on people's rights before using high-risk AI.
- **Systems already in use** · EU AI Act, Article 111(2)
  High-risk AI already used by public authorities must comply by 2 August 2030.
- **GDPR** · Regulation (EU) 2016/679
  Lawful basis, purpose limits, access and the citizen's rights.
- **NIS2** · Directive (EU) 2022/2555
  Security and incident reporting for public administration bodies in scope.
- **Interoperable Europe Act** · Regulation (EU) 2024/903
  Assessing and sharing interoperable public services across borders.

Runs inside your jurisdiction.

Governments run the pack in a national or sovereign cloud, or in their own data centres. Some services run fully offline.

WHY ADVERANT

Nexus is one platform for every industry: the government pack adds the words, workflows and rules, and the platform brings permissions, AI agents with limits, a budget for every model and a sealed record of every decision. Nine patent applications are pending in Ireland on how AI agents get authority, stay within it and have what they do recorded.

Don Scott, Founder and CEO, architect of Nexus. **Donal Hanafin**, Co-founder, two decades building products for regulated financial services.

HOW TO START

Pick one service and one kind of case, such as housing support applications. We connect your registers, switch on the pack inside your cloud, and you see it working on your own cases. We can start on a copy of past records, so nothing live is touched until you are happy.
